

Write the names of these parts of a circle.

1

3

2

Use a pair of compasses to draw circles with:

4 a radius of 3 cm

8 a diameter of 17 cm

5 a radius of 6 cm

9 a radius of 5.5 cm

6 a radius of 9.5 cm

10 a diameter of 16 cm

7 a diameter of 11 cm

11 a diameter of 14.5 cm.

Use one of your circles. Think of a way of measuring the circumference. Is there a relation between the circumference and the diameter?

I am confident with measuring and drawing circles.
