

Sorting Australian Animals

Herbivores, Omnivores and Carnivores

Cut, sort and paste the Australian animals onto the table.

herbivores	omnivores	carnivores

List the animals you think are insectivores.

Did you know?

Carnivores that eat mainly insects are called insectivores, while those that eat fish are called piscivores.

The thorny devil feeds on ants, so it is an insectivore.

Sorting Australian Animals Herbivores, Omnivores and Carnivores

koala

kookaburra

cassowary

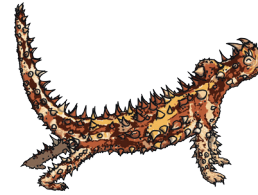

kangaroo

bilby

numbat

thorny devil

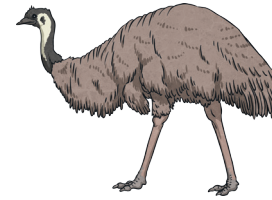

echidna

Tasmanian devil

dugong

emu

quokka

platypus

possum

quoll

wombat
