

19.1.21

LI – To add mentally two 2-digit numbers and a 2- digit number to a 3-digit number

Solve these problems.

- 1 There were 46 men and 17 women sitting in a doctors' surgery. How many people were there altogether?
- 2 A shop increases the price of a mobile phone by £73. The phone cost £44 before the price rise. What does it cost now?
- 3 Andy is 82 cm tall. Baz is 27 cm taller than Andy. How tall is Baz?
- 4 One morning a lorry driver drove 63 km. After lunch he drove 59 km. How far did he drive altogether that day?
- 5 Choose a bike and a helmet and find the total cost. Do this six times.
